

ANT-STOP/2

Item Number 4689442

REF ANT-STOP prevents ants, flies, insects and other pests from entering indoor areas via the condensate drain hose and the air conditioning unit. The integrated membrane blocks unwanted intruders and prevents unpleasant odours from the outdoor area from entering indoor spaces – while allowing condensate water to drain freely. Perfect for all vertical condensate drains with free discharge.

- **Prevents insects from entering** – Effectively protects against ants, flies and other small pests that could otherwise enter living spaces or the system via the drain hose.
- **Blocks unpleasant odours** – The membrane reliably prevents unpleasant outdoor odours from entering.
- **Opens with a small amount of water** – Ensures safe condensate drainage at all times.
- **UV- and weather-resistant** – Robust design for permanent outdoor use.
- **Easy installation** – For drain hoses with 16 mm inner diameter; tool-free installation.
- **Transparent housing** – Visual inspection possible without disassembly.
- **Replaceable and low maintenance** – The module can be quickly replaced if required.
- **Ideal for vertical drains** – Specifically designed for vertically routed drain hose installations.

Technical Data
